BR1000 Shelter
Assembly Instructions

### Flammability and Carbon Monoxide Warning and Maintenance

WARNING: KEEP ALL FLAME AND HEAT SOURCES AWAY FROM THIS TENT FABRIC.

This tent meets the flammability requirements of CPAI-84. The fabric may burn if left in continuous contact with any flame source. The application of any foreign substance to the tent fabric may render the flame resistant properties ineffective.

#### **CARBON MONOXIDE POISONING HAZARD:**

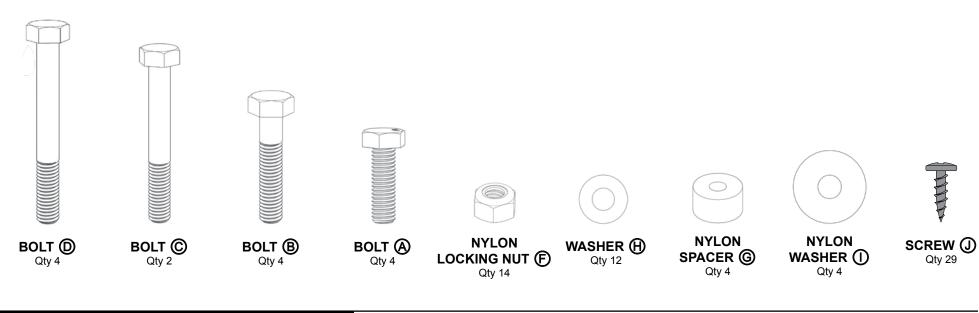

This shelter is extremely air tight and must be ventilated if using an oxygen consuming heat source. Side windows or auto-vents, depending on the shelter model, provide ventilation. **DO NOT PACK SNOW AROUND SHELTER** or in any way prevent fresh air from entering shelter. Failure to properly ventilate shelter could create a serious health hazard or death due to carbon monoxide poisoning.

**MAINTENANCE:** After each use, set up shelter until fabric is completely dry. Never leave shelter folded with a wet cover.

#### Parts (shown full size on this page)

#### Required Tools (not included)

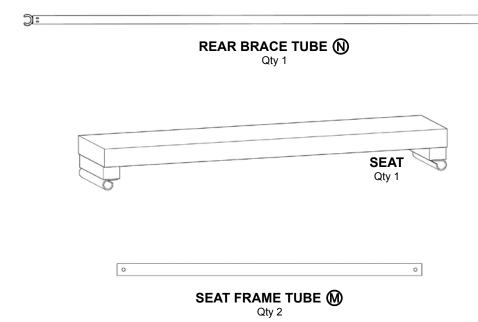

## Add Electronics Shelf to Parts List

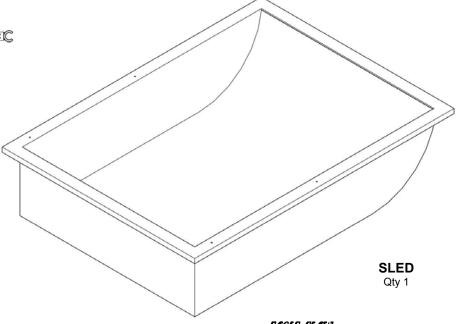

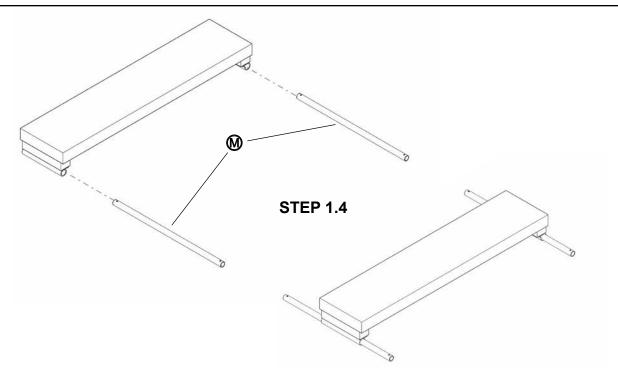

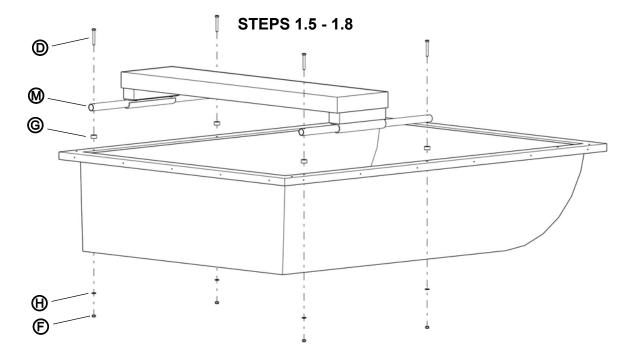

SHAPPELL

#### 1.0 Gathering All Parts and Beginning Assembly

- **1.1** Begin by removing items from the box.
- **1.2** Separate sled, seat, parts bag, framing and cover.
- **1.3** Remove all parts from the parts bag and organize by letter (as shown on page 2).
- **1.4** Insert Seat Frame tubes **(M)** through seat brackets.
- **1.5** Align the holes in tubes **(M)** with the holes on the sled.
- **1.6** Starting on one side, insert bolt **(D)** through the Seat Frame tube **(M)**, then through spacer **(G)**, through the hole in the sled and through washer **(H)**.
- **1.7** Secure the bolt with nut **(F)**. Hand tighten only!
- 1.8 Repeat on opposite side.
- **1.9** Once all nuts and bolts are installed by hand, finish by tightening with wrenches. Tighten until snug. Do not over-tighten as you may strip the bolts!

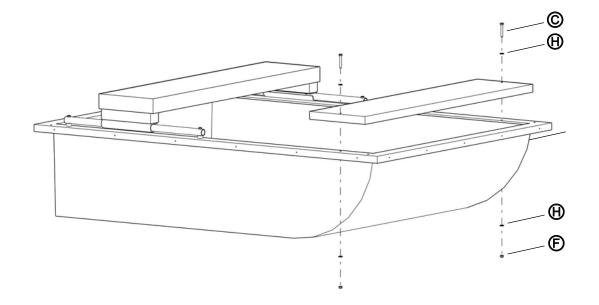

#### 2.0 Rope Installation

**2.1** Install sled rope **(K)** through holes at front of sled. Tie a knot in each end of the rope to secure to sled.

#### 3.0 Electronics Shelf Assembly

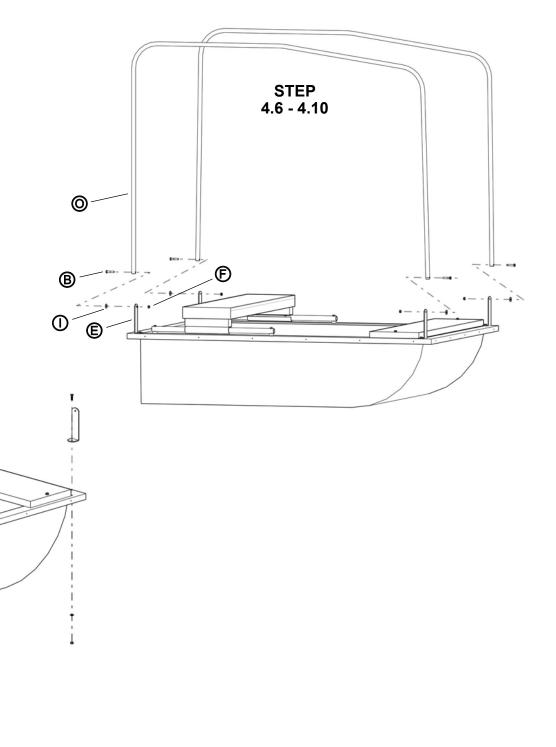

- **3.1** Place electronic shelf on the sled.
- 3.2 Insert bolt (C) through washer (H) and into electronic shelf.
- 3.3 Push bolt © through sled, a second washer ⊕ and secure with nut ⊕. Hand tighten only!
- 3.4 Repeat on opposite side.
- **3.5** Once all nuts and bolts are installed by hand, finish by tightening with wrenches. Tighten until snug. Do not over-tighten as you may strip the bolts!

#### 4.0 Frame Assembly

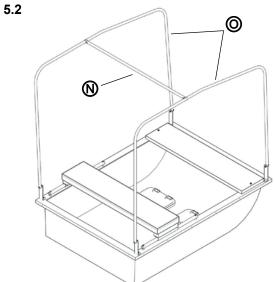

- **4.1** Begin with one Frame Bracket **(E)**.
- **4.2** Place on sled in one corner and insert bolt **(A)** through Frame Bracket **(E)**, sled, and washer **(H)**.
- **4.3** Secure with nut **(F)**. Hand tighten only!
- **4.4** Repeat on all corners of the sled.
- **4.5** Ensure all brackets are facing each other as shown in the image.
- **4.6** Next, align Frame Tubes **()** to the Frame Brackets **(E)** on the sled.
- **4.7** Starting on one side, insert bolt **(B)** through Frame Tube **(Q)**, washer **(J)** and Frame Bracket **(E)**.
- **4.8** Secure with nut **(F)**. Hand tighten only!
- **4.9** Repeat on opposite side.
- **4.10** Once all nuts and bolts are installed by hand, finish by tightening with wrenches. Tighten until snug. Do not over-tighten as you may strip the bolts!

STEP 4.1 - 4.5

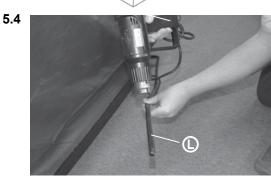

#### 5.0 Installing Shelter Cover

- **5.1** Begin by setting up shelter frame with Support Rod  $(\mathbb{N})$ .
- **5.2** Place rod between both Frame Tubes **()** and snap into place.
- **5.3** Unfold shelter cover and place on top of shelter frame as shown in image.
- **5.4** Unroll trim **(**) and place around the outside of the sled. If the trim is stiff, use a hair dryer to soften the trim to make it easier to work.
- **5.5** Starting at one corner of the sled near the Frame Bracket, push the trim over the edge of the cover and onto the edge of the sled.
- **5.6** Pull the shelter cover tight while pushing the trim onto the sled. If necessary, a rubber mallet can be used to assist in installing the trim.
- **5.7** Once trim is installed completely around the shelter, excess trim may be cut off using scissors.
- **5.8** Using a 1/8" drill bit and electric drill, drill holes through trim and sled about 12" apart starting at the corner near one Frame Bracket.
- **5.9** Secure the trim using screws **(J)**. Hand tighten only!
- **5.10** Remove paper from windows and dispose of properly.

5.3

5.6

#### 6.0 Take Down Instructions

- **6.1** While outside the shelter, pull Support Rod from the center and place in the bottom of the sled.
- **6.2** Push frame in toward the sled until both frame poles lie flat against sled.
- **6.3** Reverse steps to setup shelter.

You are now ready to go ice fishing in your new Eagle Claw Shappell Bay Runner (BR1000) Sled Based Shelter!
